The newest Teeter Hang Ups® inversion tables feature the most exciting innovation in recent years: patented **FLEX Technology™**. This ergonomic, injection-molded bed design moves with you to accommodate stretches for greater range of motion, encouraging realignment and relaxation.

'moves as you move'

SALES TIP

Teeter Hang Ups® is the only brand that offers optional accessories to allow the user to customize their inversion table.

Customize to meet the customer's needs.

EP-550

The EP-550 is the entry-level model for the EP-series line, with a spring-lock ankle clamp system, new Ankle Comfort Dial™, and adjustable head pillow.

EP-550 Sport

Our Sport model includes all the features of the EP-550 plus CV Bar, Gravity Boots, and EZ Stretch Traction Handles. The Gravity Boots offer an alternative to the standard ankle clamps, boasting super-soft foam liners and a lightweight but highly

durable shell for a secure and comfortable fit. The Boots can be utilized with the inversion table or at the gym. The Traction Handles offer a way to achieve greater decompression, even while only partially inverted, or as a tool for aiding in oscillation.

EP-950

Beyond those offered by the EP-550, the EP-950 model inversion table boasts additional features to make the inversion process easier and more comfortable. With a comfort grip easy-to-reach ankle ratchet, this model is ideal for those who have a difficult time bending down to secure their ankles. The over-sized tubing, larger Over EZ Handles, EZ-Angle tether strap and Traction Handles make this model stand out as the ultimate in manually-operated inversion tables.

All Teeter Hang Ups® are UL Classified 60601-1 and include an Owner's Manual and instructional DVD included.

EP-950

Popular options include the Adapter Kit (with Gravity Boots and CV Bar) or Vibration Cushion with Far Infrared Neck Support.
