Ergonomic Flex Technology™: Our patented design moves with you, accommodating stretches for greater range of motion. Movement while inverted encourages realignment and relaxes muscles. An adjustable pillow keeps it comfy.

Optimum Decompression Surface: The smooth surface reduces friction, allowing the body to slide and achieve the optimum decompression stretch.

No Tear, No Stain Construction: Plastic injection-molded construction is more durable than typical nylon or vinyl beds vulnerable to wear and tear. The easy-to-clean surface ensures pristine appearance over years of use.

Ankle Comfort Dial™: The new foot platform design dials up or down for smaller or larger feet, allowing a comfortable and secure fit for the ankle clamps.

Standard Corner Feet: Increases frame base by 20% and reduce sliding on hard surfaces.

Unique to the EP-550 SPORT Option

Upgrade your table to the Sport to increase versatility and intensify your inversion experience.

Gravity Boots: Use your Gravity Boots with the table or take them to the gym; great for inverted sit-ups and squats. The Gravity Boots wrap comfortably around each ankle, securing with adjustable, self-locking ratchet buckles. Super soft 5/8" foam liners are a special blend to give maximum comfort with minimum compression. Made of light, highly durable DuPont™ Hytrel™ material for a comfortable fit.

EZ Stretch™ Traction Handles: With the muscles in your lower back relaxed, pushing on the handles can help to increase traction and enhance your stretching experience. The handles can also be used as a tool for intermittent traction and oscillation.

SALES TIP

Why **FLEX** Technology™?

When you include light stretching and small movements to your inversion routine, the benefits you experience can increase dramatically.

Demonstrate how the new patented design moves as you move.

Tell your customers that stretching encourages vertebrae realignment and relaxed muscles.
